

My Success Story

I am a 63 yrs. old recovering alcoholic, who diligently went to work, managed to go to school, and earn a Master's degree. I spent a long time denying the fact that I was an alcoholic until I hit bottom and realized what needed to be done. I admitted myself into a facility for my detox and completed my 28 days in rehab. I then decided to come to Claudia and Eddie place to continue my recovery. I've been here for 10 months, and I've found a safe haven, offering comfort, and support. Being here you learn the principles of NA and AA fundamentals and techniques for recovery. My family and friends have noticed the complete change in me since I have been in this program. Currently I'm attending classes to pursue a certification in addiction and recovery, so I can help another person who's fighting this disease of addiction. I can say wholeheartedly that coming to Claudia and Eddie place has been a blessing to me, enables me to think positive, and strive for bigger and better things in life.
